

EvaluWise Version 1.3.0 Overview

Home Dashboard: The Home Dashboard has a new look.

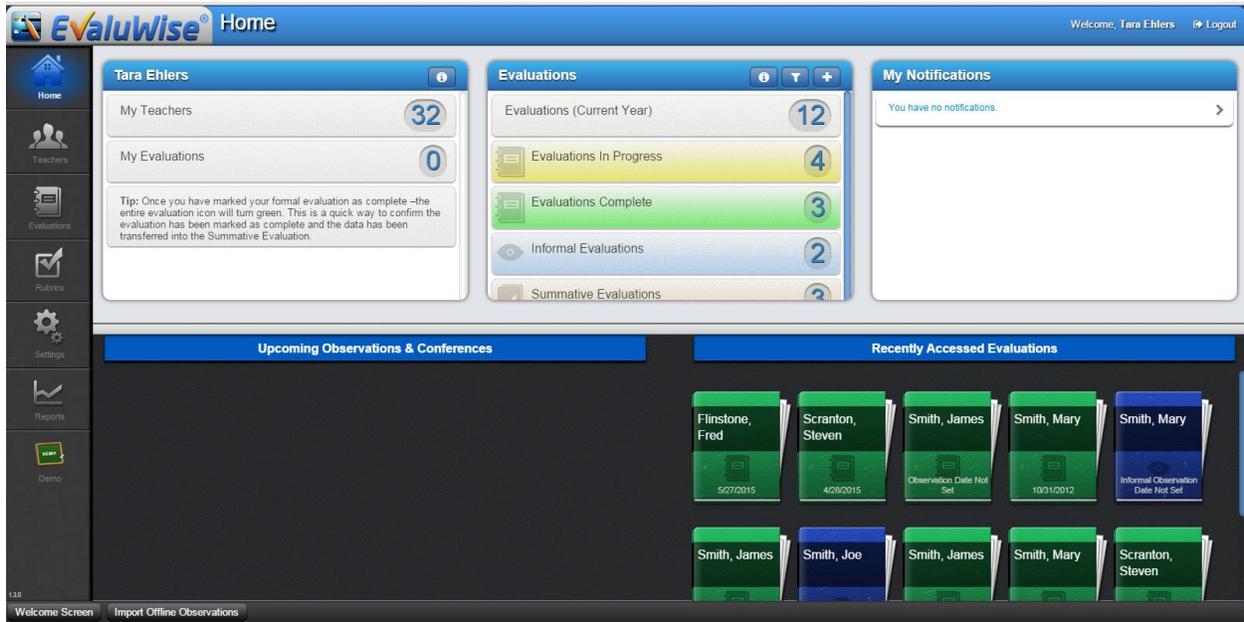

Figure 1

The first section (Figure 2) provides a count of all teachers that an administrator has access to based on permissions, the count of all evaluations created during the current year, and some useful tips.

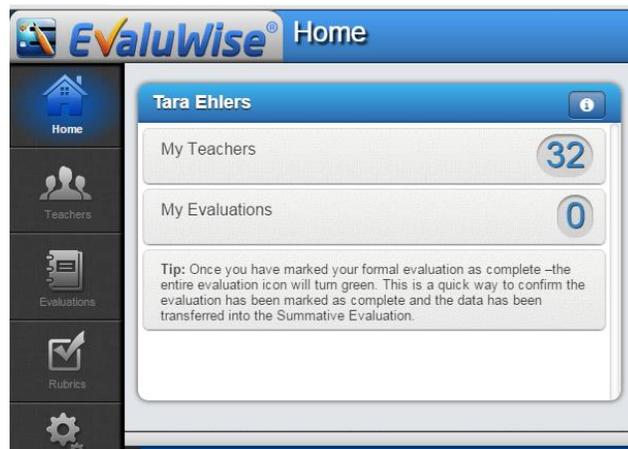

Figure 2

The center section (Figure 3) includes evaluation counts based on which evaluations you have permission to access. These areas are clickable, allowing you to drill into the numbers and view the evaluations. You have the option to filter this section by additional criteria and also have the option to start a new evaluation by selecting the + button.

Figure 3

The 3rd section provides notifications to the administrator. This lets you know when a teacher has completed certain portions of the evaluations phase (Uploading artifacts and completing forms. Additionally, EvaluWise® will use this section to notify you of upcoming maintenance or version releases.

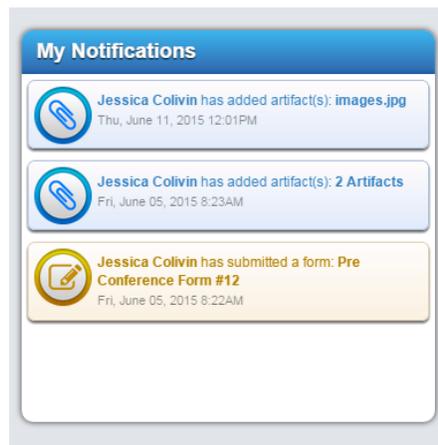

Figure 4

New Features on the Teacher Tab:

The ability to see all evaluation types for a teacher when you select their name. You also have the option to add a new evaluation from that screen by selecting the + button by each evaluation type. Figure 5

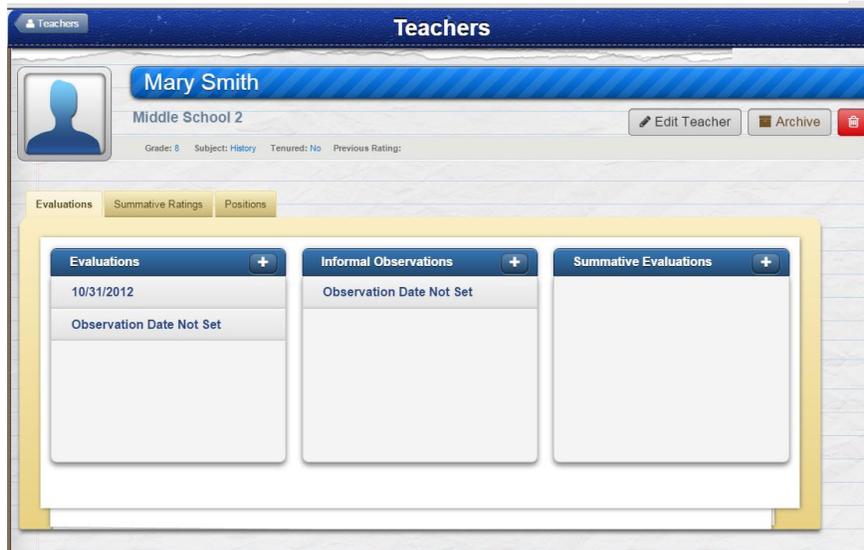

Figure 5

Additional features have been added under the Manage Teacher Button on the Teacher screen. Also there is an option to bulk export teachers into a CSV file. The ability to import teachers into EvaluWise is still there as well. Figure 6

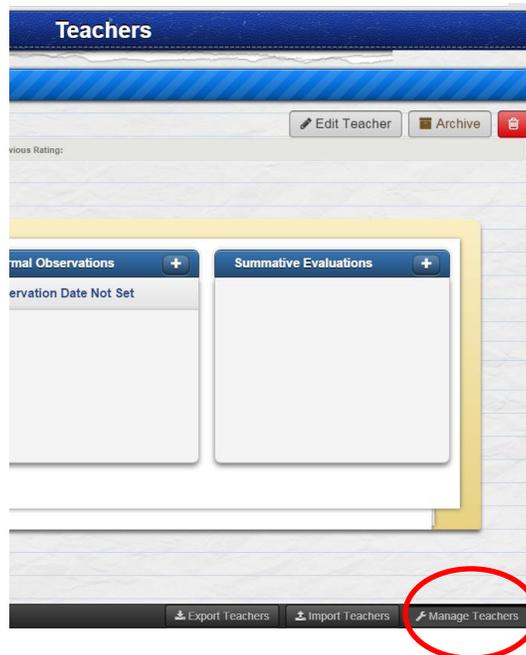

Figure 6

Manage Teachers allows you to select which teachers are active and will be evaluated for the current school year as well as an option to archive a teacher which would hide teachers who are no longer with your organization. The data for teachers that are archived will remain in EvaluWise but be hidden from view in main teachers list. Figure 7

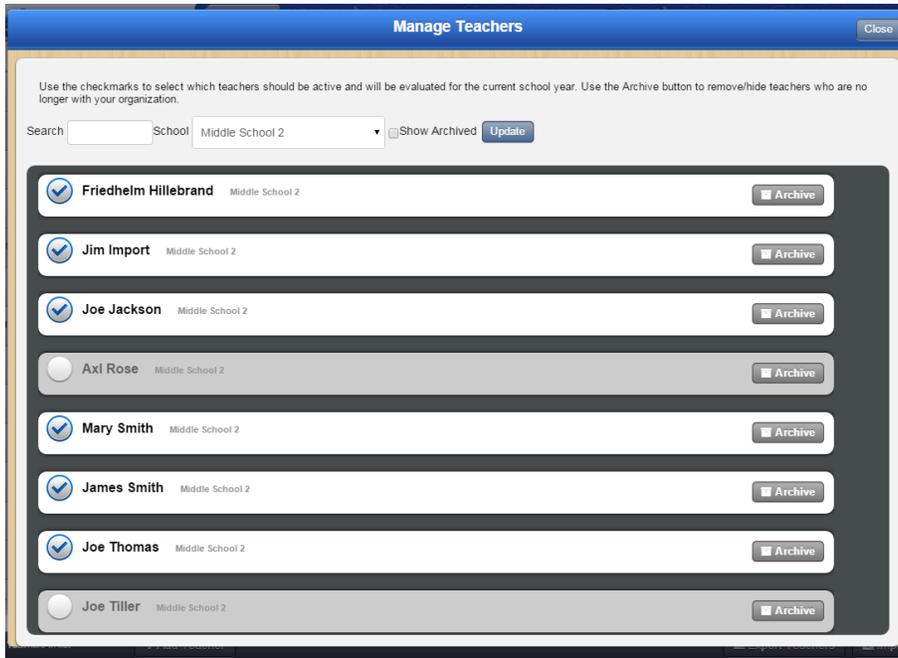

Figure 7

You also have options on the top of the screen to filter this information as well as listing all the teachers archived. Figure 8

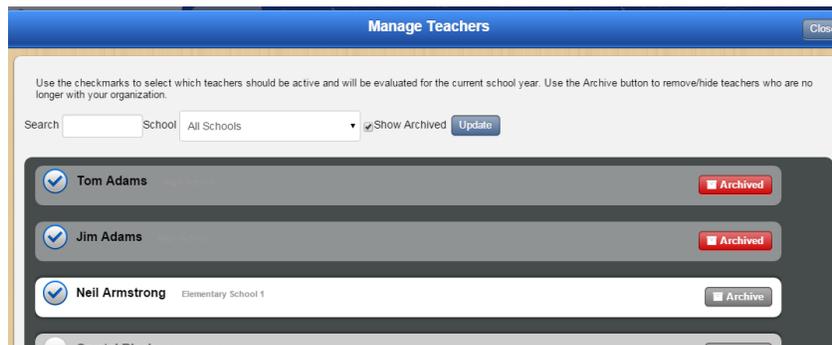

Figure 8

Evaluation Scripting Updates:

In version 1.3.0 you can now Edit and Pair the components with one click when scripting in evaluations.

Figure 9

In addition an option to use a simple selection method has been added. To set up simple selection, go to Settings and select the Preferences Tab – Select Yes for – Classroom Observation – Use Simple Selection Style. Figure 10

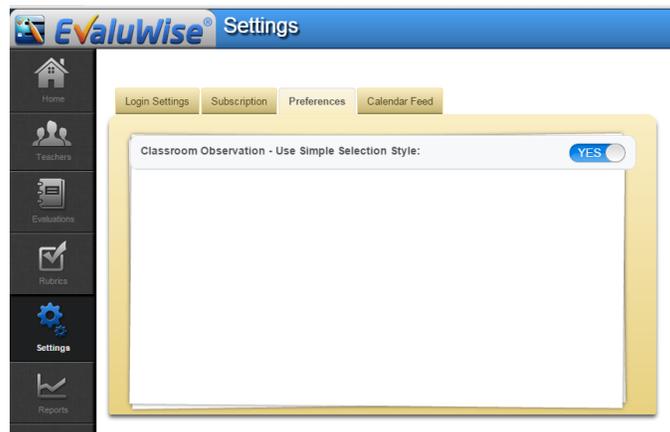

Figure 10

This feature allows you to pair your scripting with all the components without clicking between the domains. Figure 11

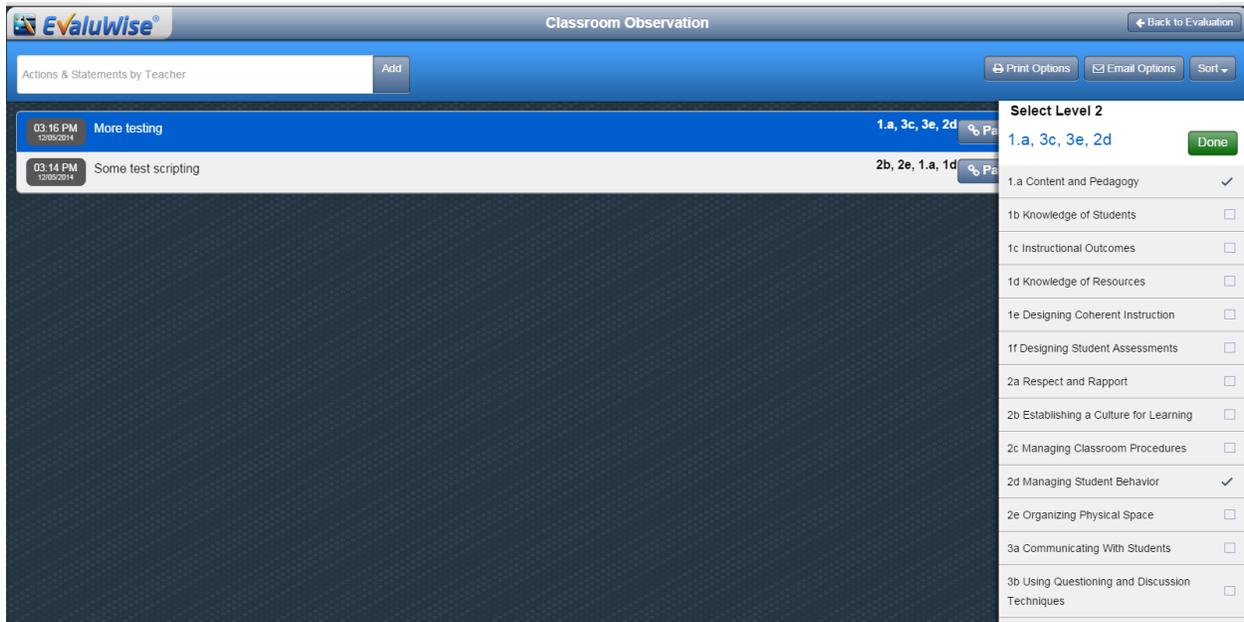

Figure 11

Updates to the Teacher Dashboard:

Teachers Can View Rubrics: Teachers now have the ability to view the rubrics from the Teacher dashboard.

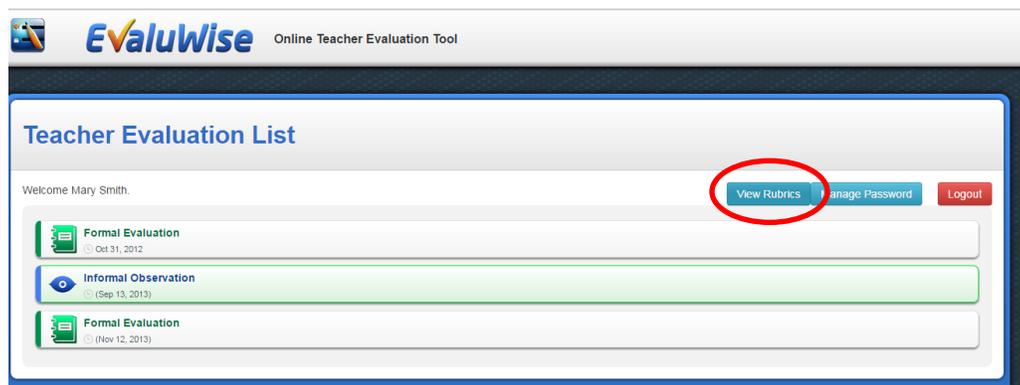

Figure 12

Teachers Can Save or Save & Submit a form: Teachers now have the option to save a form and it will not submit it to the administrator. Once they have the form completed and ready to send they can select the save & submit button and it will be sent to the administrator.
Figure 13

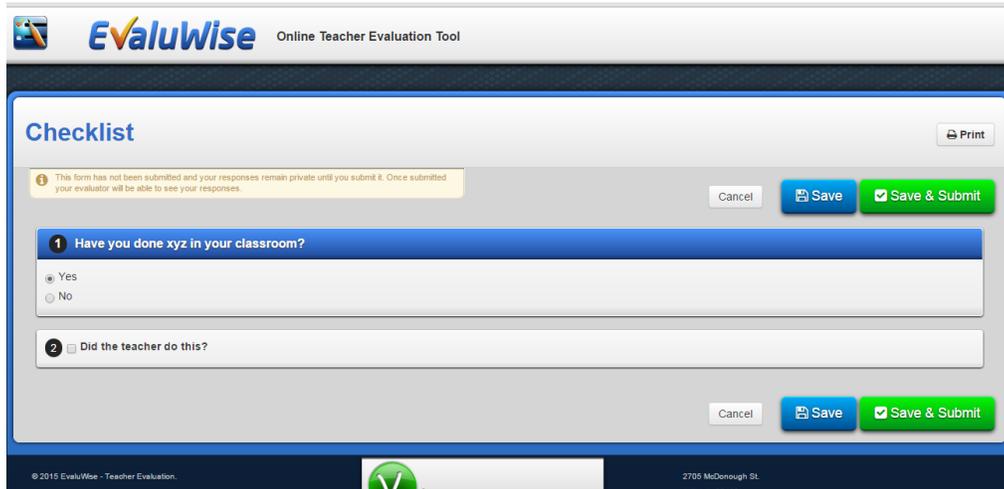

Figure 13

Teachers can View Evidence: Teachers now have the ability to view scripting evidence on the dashboard when Evaluators turn on the option. Figure 14
Evaluators can turn this on under the Teacher Access button on each evaluation.

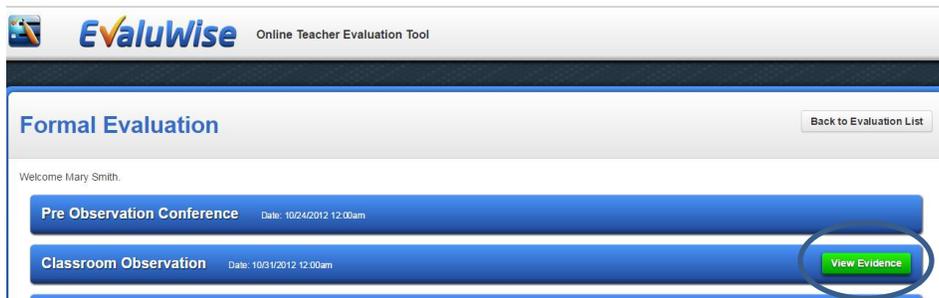

Figure 14

EvaluWise Administrator Options:

EvaluWise Administrators now have the option to Lock the ability for others to edit teachers as well as adding new teachers. This feature is located under settings – On the right side of the screen under Organization select the Options tab and Select Yes or No to turn this feature on or off. Please Note only the EvaluWise Administrator has access to this feature. Figure 15

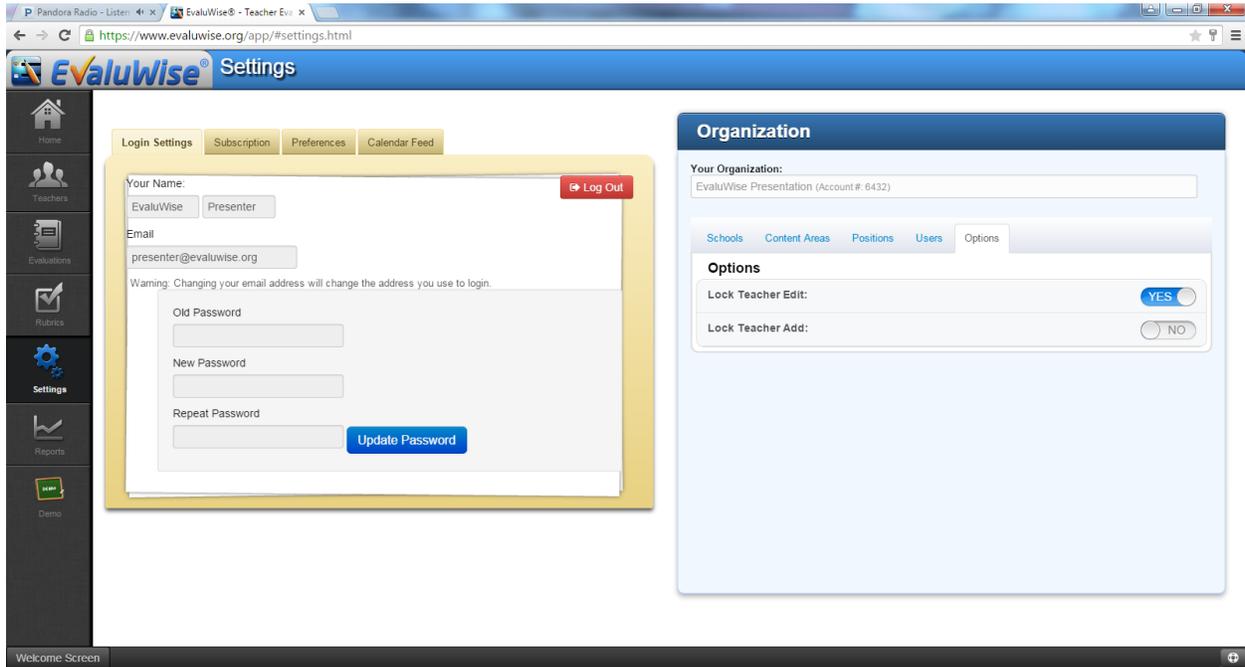

Figure 15

Improved Form Setup in Rubrics:

- Users can now drag and drop form questions to reorder them when configuring forms. Figure 16

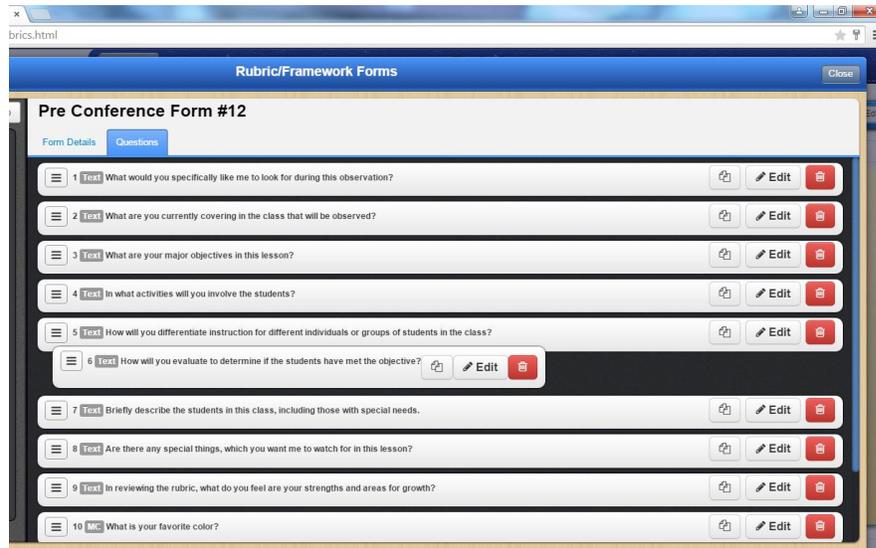

Figure 16

- Click this button  to duplicate a question on a form and then edit to change one or two words. Figure 17

Figure 17

New Reports:

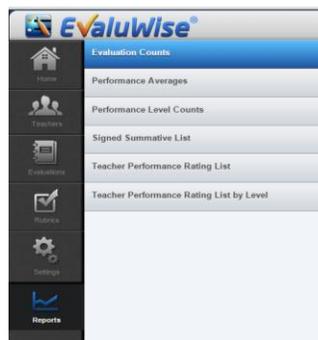

Figure 18

Evaluation Counts – This report displays evaluation counts for each teacher and each evaluation type. Figure 19

The screenshot shows a window titled "EvaluWise Report | EvaluWise - Teacher Evaluation" with a date range of "07/01/2014 - 06/30/2015". It contains a table with the following data:

Teacher	Informal	Formal	Summative
Helen Wilson	0	1	0
Drew Tiller	0	0	0
Randy Roberts	0	0	0
Phillip Rawles	0	0	0
Jane Walker	0	0	0
Jessica Colivin	1	3	0
Mary Rakes	1	0	0
Jason Ritter	0	0	0

Summary statistics at the bottom of the table:

- Total Informals: 2
- Total Formals: 4
- Total Summatives: 0

Figure 19

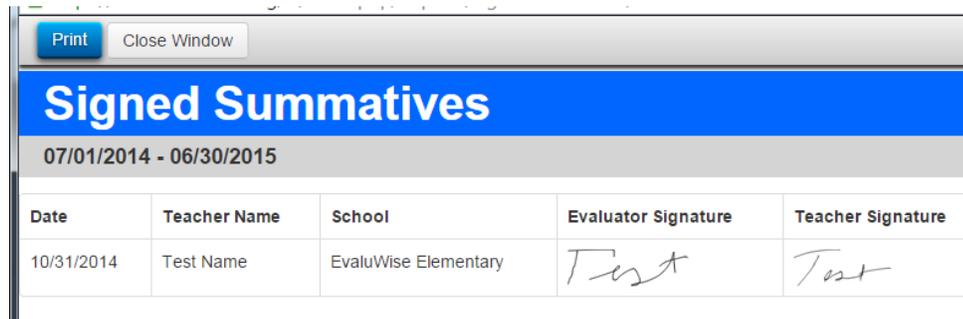

Teacher Performance List by Level – This report displays a list of teacher in columns by performance level. Figure 20

The screenshot shows the "Reports" section of the EvaluWise interface. The left sidebar lists various report options, with "Teacher Performance Rating List by Level" selected. The main content area displays the configuration for this report:

- Performance Rating List by Level Counts**
- Description: This report displays a list of teachers in columns by performance level.
- School:** All Schools (dropdown menu)
- Rubric:** New EvaluWise Demo Rubric (dropdown menu)
- Run Report** button

Figure 20

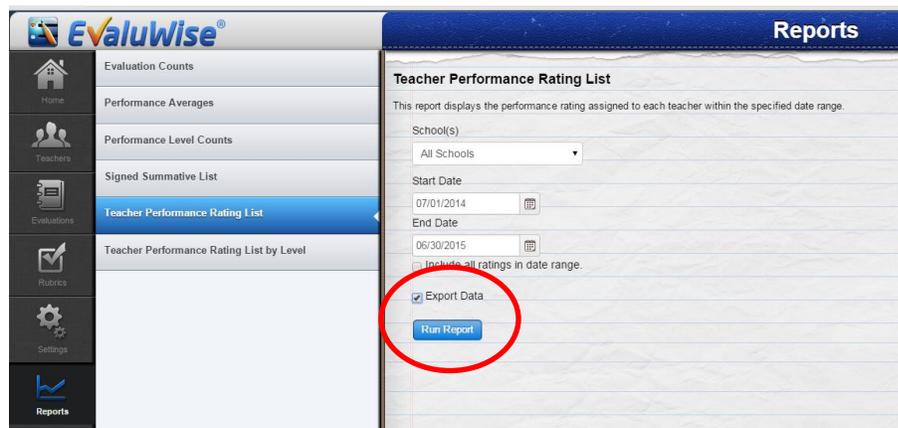

Signed Summative List – This report displays a list of summative evaluations that have been signed by the evaluator and teacher. Figure 21

Date	Teacher Name	School	Evaluator Signature	Teacher Signature
10/31/2014	Test Name	EvaluWise Elementary	Test	Test

Figure 21

Teacher Performance Rating List Report - You now have the option to export the data into a CSV file. Figure 22

The screenshot shows the EvaluWise interface with a sidebar menu on the left containing options like Home, Teachers, Evaluations, Rubrics, Settings, and Reports. The main content area is titled 'Reports' and displays the 'Teacher Performance Rating List' report. The report includes a description, a 'School(s)' dropdown menu set to 'All Schools', 'Start Date' (07/01/2014) and 'End Date' (06/30/2015) fields, and a checkbox for 'Export Data' which is checked and circled in red. Below the checkbox is a 'Run Report' button, also circled in red.
